But on occasion, events of such horrifying violence and impact occur, and staff within the ED are called to rise and respond.</p> <p>In this session, presenters will reflect on the Emergency Medicine response to three world-changing examples of violence perpetrated on fellow humans- the 1996 Port Arthur shootings, the 2019 Easter bombings in Sri Lanka, and the shootings in Christchurch in March of this year.</p> <p>We will also explore the impact these events have had on the Emergency Medicine community, and the affected communities more broadly.</p>
